

REACH INTO THE CLOUD

DIRECTLY **SCAN TO AND PRINT FROM** YOUR CLOUD SPACE WITH KYOCERA **CLOUD CONNECT**.

In a time when mobility is becoming increasingly important, using smartphones, tablet PCs and cloud services has become the norm. Travelling lightly means you now store your documents in the cloud – but what if you urgently need to print one of these documents? And how do you quickly share a paper document with remote colleagues?

This is where KYOCERA Cloud Connect comes in, allowing you to access your personal cloud space directly from any HyPAS™-enabled MFP. This means that you can travel lightly confident that you can turn paper documents into digital files or do the reverse with just one push of a button and without the need for a computer.

BUSINESS CHALLENGES

- > Travelling light, I store my documents in my cloud space – **how can I make sure I can print them without my computer?**
- > When digitising my documents, I first scan them into my PC and then upload them to the cloud – **isn't there a faster way?**
- > Data security is crucial to my business – **are cloud services really secure?**

YOUR ADVANTAGES WITH KYOCERA CLOUD CONNECT

- > **Print without a computer:** you can easily access and print your documents stored in Google Drive™ or Evernote™ from any MFP.
- > **Take the shortcut:** KYOCERA Cloud Connect enables you to scan documents directly into your cloud account, without a PC.
- > **Data security:** log into your account with your username and password – the security of your data is ensured.

HyPAS™ – TAILOR YOUR MFP TO SUIT YOUR BUSINESS

HyPAS™

HyPAS™ is KYOCERA's platform to develop custom MFP business applications. These run embedded inside the device and extend the device's functionality according to each user's needs. For powerful functionality, MFP applications can connect to external server applications and integrate the MFP perfectly into the company's workflows. With HyPAS™, KYOCERA can meet individual customer requirements and provide the right solution for your business.

FEATURES & SPECIFICATIONS

Printing those files from the cloud is easy. KYOCERA Cloud Connect is the bridge between your MFP and your cloud storage space: it allows you to access and upload files in your Evernote™ or Google Drive™ account directly from your KYOCERA MFP. KYOCERA Cloud Connect supports formats including JPEG, PDF and TIFF. The intuitive menu structure makes it easy to use. If you store multiple documents in your cloud space, you will appreciate the comfortable search function that quickly and accurately displays the documents you are looking for. However, the major benefit of KYOCERA Cloud Connect is that it completely eliminates the need to carry around paper documents or a personal computer.

Scan to Cloud – upload scanned documents directly to your Evernote™ or Google Drive™ cloud account.

Quick search – show all documents or use the search function directly from the MFPs control panel.

Print from cloud – access your documents directly from the control panel of the MFP.

Supported languages – the application can be set up in English, Spanish, French, Italian, German or Japanese.

No PC required – easy installation and usage without the need for a separate server.

File formats – JPEG, PDF and TIFF are supported for printing and scanning.

PRINT ANYWHERE & EVERYWHERE

Mobile devices, such as smartphones and tablet computers, have changed the way we work and constantly create new business challenges. Business life has become a fast-paced world, where documents are increasingly stored or even shared in the cloud.

KYOCERA can support all your needs involving mobile and cloud services, whether it is printing from a mobile device or from the cloud, as well as ensuring the security of mobile solutions.

SUPPORTED DEVICES
