

Kyocera solutions: discover the possibilities

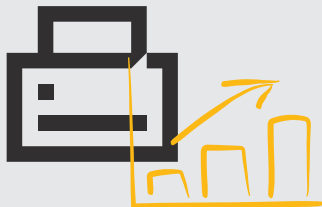

Secure Audit

The increased risk of cyber security threats and need for data compliance means that checking the security of MFPs has become a high priority for organisations. KYOCERA have developed a solution that provides a complete and thorough security check of your device, allowing for an autonomous printer security audit that reports compliance and highlights breaches, giving you peace of mind in an environment that is increasingly susceptible to cyber threats.

Cloud Direct

With many organisations now choosing Cloud storage as their primary storage method, requiring access to documents wherever and whenever is essential. Employers are looking for the easiest way for their employees to access saved documents in the Cloud. KYOCERA Cloud Direct refines accessibility through support of Google Drive, Dropbox, Box, and OneDrive for Business, improving convenience...

Cluster Printing

High Speed Printing, without the big investment. Maximise your productivity of your existing equipment by intelligently splitting jobs between print devices. Simple, highly efficient, and, cost effective, Kyocera Cluster Printing cuts printing time in half and make missed deadlines a thing of the past.

CLA App

The Copyright Licensing Agency (CLA) has partnered with KYOCERA Document Solutions UK to create 'CopyScanPublications', an app designed for school copiers and scanners to capture copying of any publication used by teachers. The KYOCERA app reduces inconvenience, improves efficiency, whilst enhancing compliance by providing CLA with accurate real-time data on copies made in schools.
