

TASKalfa Pro 15000c

The KYOCERA TASKalfa Pro 15000c brings Kyocera Document Solutions into the production printing arena with a product built on the hallmarks of the organisation: reliability, quality, sustainability and efficiency. Cutting-edge technology ensures that the device provides a solution that can help your business to achieve more.

 **1,000,000 pages/month**

Able to print up to 1 million pages per month, you can count on the TASKalfa Pro 15000c for your intense printing needs of all quantities. Print in high quantities without ever having to contemplate a compromise on the quality of the end product.

 **3.8 kWh Power Consumption**

With an average power consumption of 3.8 kWh and a Total Electricity Consumption value of 4.5 kWh, the TASKalfa Pro 15000c prints in high volumes with low energy usage, reducing your costs and environmental impact.

 **5.5 seconds from standby**

With a warm-up time and time to first print of just 5.5 seconds from standby, the TASKalfa Pro 15000c provides flexibility and a rapid printing solution which can spring straight into action to help you to meet even the tightest of deadlines.

 **Easy maintenance**

The TASKalfa Pro 15000c is designed with few moving parts to reduce the need for maintenance, routine checks and work can be carried out after 600,000 prints by a skilled operator in just 35 minutes.

 **Custom personalisation**

Utilising the latest software, you can personalise each and every page of your documents in the blink of an eye. Add value to your documents without complicating the print job or costing time or money.

 **Integrate with your workflows**

Multi-task on various processes at once and link up existing workflow management systems with the device. This serves to enhance the usability which is also provided by a nine inch touchscreen panel.
